Office Action Summary	Application No. 10/505,446	Applicant(s) FERRANTE, ANTONIO	
	Examiner Paul C. Martin	Art Unit 1655	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claims 32-62 are pending in this application.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 32-41, drawn to an assay system for grading a substance.

Group II, claim(s) 42-53, drawn to an assay system for grading a substance.

Group III, claim(s) 54-59, drawn to a method of preparing a therapeutically active emu oil.

Group IV, claim(s) 60-62, drawn to a method of preparing a therapeutically active fraction from emu oil.

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

PCT Rule 13.2 requires that unity of invention exists only when there is a shared same or corresponding technical feature among the claimed inventions. All the groupings are directed to a method or apparatus for the preparation and analysis of a substance for anti-inflammatory activity, but each group has a different technical feature not shared by the remaining groups. Group I is directed to an assay system for grading a substance to assess its anti-inflammatory ability which has the technical feature of performing the analysis *in vivo* by injecting into an animal, not shared by any of the remaining groups. Group II is directed to an assay system for grading a substance to assess its anti-inflammatory activity which has the technical feature of performing the analysis *in vitro* on a cell culture preparation, not shared by any of the other groups. Group III is directed to a method of preparing a therapeutically active emu oil, which has the technical feature of heating emu oil or tissue to obtain the active components therein, a technical feature not found in any other group. Group IV is directed to a method of preparing a therapeutically active fraction from emu oil or tissue, which has the technical feature of extracting the oil or tissue with an organic solvent, a technical feature not found in any of Groups I-III.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Paul C. Martin whose telephone number is 571-272-3348. The examiner can normally be reached on M-F 8am-5pm.
